Certifications - [Fullstack Web-Development \(Udemy\)](#) , [Microsoft – Azure Fundamentals \(AZ-900\)](#)

Professional Summary

I am an undergrad with a foundation in Web Development and Data Structures. I have experience in designing web APIs with frameworks and technologies such as Node and Express. Moreover, I have worked with SQL and NoSQL databases such as MongoDB and MySQL. I am eager to solve complex problems through code and continuously enhance my skills by exploring new technologies. I am excited to contribute to meaningful projects and thrive in a challenging environment.

Technical Skills

Programming Languages: Java, JavaScript (ES6+).

Backend: Node JS, Express, REST API Development.

Frontend: HTML, CSS, JavaScript (ES6+), ReactJS, Bootstrap.

Databases: MongoDB, MySQL.

Other: Object Oriented Programming (OOP), Data Structures, Website Hosting, Version Control (GitHub), API Testing and Debugging.

Work Experience

Kasnet Technologies Pvt Ltd. (Trainee) Jan 2025 – Feb 2025

- Built an interactive sales dashboard during training, incorporating bar charts, KPI cards, and trend visuals to represent pizza sales data across time periods and categories.
- Gained foundational knowledge of cloud computing concepts through Microsoft Azure, supported by earning the AZ-900 certification.

Projects

CampSites | <https://campsites-a3ug.onrender.com/> | [GitHub](#)

JavaScript, Node, Express, EJS, MongoDB, HTML, CSS, Authentication, Cloud, REST APIs, Bootstrap, GitHub

- Built and deployed a full-stack MVC web application with server-side rendering using EJS, implementing 15+ routes with session based authentication via Passport.js.
- Integrated Cloudinary for cloud-based image storage, avoiding binary data in MongoDB and enabling CRUD operations on campground images.
- Wrote reusable authorization middleware to enforce ownership-based access control, ensuring users can only modify their own campgrounds.
- Applied middleware for access control ensuring users can only modify their own content.

Online Voting Booth | https://github.com/PrasadBhakare04/voting_app

JavaScript, Node, Express, MongoDB, Authentication, REST APIs, GitHub

- Designed and built a stateless RESTful API using Node.js and Express with JWT-based authentication, where the server issues a signed token on login and verifies it on every subsequent request without storing any session state.
- Implemented role-based access control with three distinct roles – voter, candidate, and admin – each with separate permissions enforced at the route level using middleware.
- Used independent MongoDB operations to ensure vote integrity, preventing race conditions when multiple users vote simultaneously.
- Admin role restricted from voting; candidates self-register and are verified before appearing on the voters list.

RealKhabr

JavaScript, Node, Java, ReactJS, Spring Boot, MongoDB, GIT, Authentication

- Designed and developed backend using Spring Boot and Node.js to handle real-time news aggregation with secure REST APIs.
- Aggregates and personalizes real-time news feeds from multiple sources.
- Integrated AI-powered search functionality for intelligent news discovery.
- Made APIs secure and RESTful.

Personal Portfolio Website | <https://prasadbhakare04.github.io/Portfolio/>

- Designed and deployed a website showcasing my skill and proficiency over HTML, CSS, and JavaScript.

Education

Bachelor of Engineering in Information Technology | CGPA – 8.98

Sinhgad Institute of Technology and Science, Narhe | 2022–2026

Higher Secondary (XII) – Maharashtra State Board | 2022 | 67.50%

Secondary (X) – Maharashtra State Board | 2020 | 88.80%
